Python · C language

HOBBIES

- **Travelling**
- **Dancing**
- **Learning Languages**

Experiences

IT Project Lead @ Devoteam

`Data flow` `Project Management`

Managed projects for implementing data flows to secure transfers within Carrefour Banque and ensure GDPR compliance.

2024 (6 months)

Web Developer @ Marine Nationale

`JS + PHP + SQL`

Built a web application that manages the 400k+ yearly demands for access to the Brest Naval Base.
- It solves a security concern of the naval base
- Improves the management and oversight over the validation processes of a demand.
- Is adaptable to the 19 other bases of the French Navy
- Validation processes are 100% adjustable by the authorities

2022-2023 (6 months)

Project - Tech Solution for the health of workers

`PHP + SQL + JS` `Agile Method` `C`

School project, had to provide a tech solution for businesses in the construction sector.
Built a system of sensors and a web site that communicates with the system.
The website can show the sensors' values, give an alert if the working conditions are too bad, manage the companies' workers and assign them to worksites.

Tailored Tourist Tours - Website

`Java + mySQL + JS`

Developed a website that recommends itineraries for tourists wishing to visit French monuments and cultural sites.
Implemented an algorithm based on the nearest insertion algorithm

UI/UX Design Project - SEBRA - Data centralization mobile app

`UI/UX`

Centralizes user data related to goals within the app to facilitate progress tracking (e.g., calorie counter, activity, sleep quality, etc.).
- Conducted UX research with users.
- Created a prototype in Figma, tested through user interviews.

Project - Yokai Game (Card Game)

`OOP` `Java` `JavaFx`

Made a multiplayer card game by the name of Yokai for a school project in Java..

Education

Institut Supérieur d'Électronique de Paris
